- HTML
- CSS
- Web Accessibility
- JavaScript, Vite & React
- NPM
- Git
- Case Management
- Working in a team
- Bilingual (Spanish)

02 PROJECT HISTORY

Dragon Trainer Monthly

https://josueramirez1.github.io/dragonTrainerMagazine/

- Designed website built to take an API call from a server to display updated contents on web page.
- This helped website receive update when servers were updated with new stories.
- This helps users who are subscribed to Dragon Trainer Monthly to always receive up-to-date information and stories about people and topics of interest.

Auto Glass

https://josueramirez1.github.io/directQuality/

- Built for client who has small auto glass business
- The website helps the owner build an online presence and organize incoming forms.
- The website helps bring new and returning clients to business owner to sell service and build revenue from their service

Monster Game

https://josueramirez1.github.io/monsterGame/

- Built Monster Game by using icons to hide Monsters and sock behind a door.
- I wanted to build a user-friendly game to introduce people to online gaming

- By building this game, it allows users the opportunity to engage in a fun, stress-free, environment with a low-learning curve.

Omnifood

https://josueramirez1.github.io/omnifood/

- A food delivery subscription service.
- The website helps the owner establish interest and receive incoming forms based on price chosen.
- The website helps the user receive fresh, ready-made food without dietary constraints and/or spending time cooking.
